

### Finding topics and developing ideas

Answer all questions in short sentences. Of course you don't have to limit yourself to the questions of your „category“

#### For Scientists

1. What am I working on?

---

2. What do I get excited about?

---

3. What makes it so exciting that I want to deal with it every day?

---

4. What do I tell my friends about my work?

---

5. What was the last exciting discovery in my research?

---

#### For Students

1. What is my favourite lecture?

---

2. What am I excited about?

---

3. What do I most like to tell my friends about school / my studies?

---

For everyone

1. What have I always wanted to know?

-----

2. What kind of science video would I like to see?

-----

3. Which scientific discipline or topic do I find exciting?

-----

Write down what topics you would like to deal with.

Which of these topics do you find really exciting?

This is the topic of my Video:-----

**FASTFORWARD=SCIENCE**

As before, answer all the questions in short sentences.

1. What is the topic?

---

2. Who is the target group?

---

3. What is the style of the video? (Talking head, animation, stop-motion)

---

4. What kind of narrative? (humorous, serious, witty)

---

5. What is the most exciting, interesting, relevant point?

---

6. Expected length of the Video?

---

This is how I imagine my Video to be:
